Metallic area of supported iridium catalysts 203

Catalyst characterization (TEM, XPS)

Effect of Pd/C dispersion on its catalytic

properties in acetylene and vinylacetylene
hydrogenation 277

Catalyst characterization (TPD)

Determination of framework concentrations of gallium in [Ga]-ZSM-5 177

Catalyst characterization (TPD, TPR)

Potassium promotion of Ni/Al₂O₃ catalysts 159

Catalyst characterization (TPR)
Characterization of the standard nickel/
silica catalyst EuroNi-1. II. Chemical aspects: precipitation, reduction and chemical analysis 65

Catalyst characterization (TPR)
Oxidative redispersion of palladium and
formation of PdO particles in NaY. An application of high precision TPR 189

Catalyst characterization (XRD)

Effect of high-temperature reduction on carburization of alumina-supported palladium: evidence for palladium-aluminium alloy formation 267

Catalyst preparation (evaporation)

Effect of the composition of vanadium-titanium binary phosphate on catalytic performance in vapor-phase aldol condensation 29

Catalyst preparation (precipitation)
Characterization of the standard nickel/
silica catalyst EuroNi-1. I. Background,
aims, organization and outline 59

Catalyst preparation (precipitation, reduction)
Characterization of the standard nickel/
silica catalyst EuroNi-1. II. Chemical aspects: precipitation, reduction and chemical analysis 65

Catalyst preparation (coprecipitation)
Stabilized magnesia: a novel catalyst
(support) material 79

Catalyst preparation (dry mixing)

Preparation and evaluation of catalysts for
the production of ethylene via steam
cracking. Effect of operating conditions on
the performance of 12CaO/7Al₂O₃ catalyst 119

Catalyst preparation (hydrothermal synthesis)

¹²⁹Xe-NMR investigation of SAPO-37 L1

Catalyst preparation (incipient wetness)
Sulphidation of carbon-supported ironmolybdenum oxide catalysts 217

Catalyst preparation (ion exchange)
Oxidative redispersion of palladium and formation of PdO particles in NaY. An application of high precision TPR 189

Catalyst preparation (other)
Conversion of methanol to hydrocarbons
over silica-alumina. Selective formation of
lower olefins 139

Catalyst preparation (promoter addition)
Potassium promotion of Ni/Al₂O₃ catalyst 159

Catalyst preparation (reduction)

Effect of pressure on the reduction rate of
a fused iron catalyst for ammonia synthesis

111

Catalyst preparation (surface interaction)
Effect of Pd/C dispersion on its catalytic
properties in acetylene and vinylacetylene
hydrogenation 277

Catalyst preparation (vapour-phase deposition)

Para-selectivity of dialkylbenzenes over modified HZSM-5 by vapour phase deposition of silica 257

Catalyst preparation (wet impregnation)

Metallic area of supported iridium catalysts 203

Catalyst preparation (wet impregnation)
Oxidative coupling of methane over thallium based silica supported catalysts 241

Catalyst preparation (zeolite synthesis)

Determination of framework concentrations of gallium in [Ga]-ZSM-5 177

Coal tars

Catalytic hydroprocessing of simulated coal tars. I. activity of a sulphided Ni-Mo/Al₂O₃ catalyst for the hydroconversion of model compounds 91

Coal tars

Catalytic hydroprocessing of simulated coal tars. II. Effect of acid catalysts on the hydroconversion of model compounds on a sulphided Ni-Mo/Al₂O₃ catalyst 101

Coke formation

Coking and deactivation of zeolites – a Review 1

Coke formation

Catalytic hydroprocessing of simulated coal tars. I. activity of a sulphided Ni–Mo/ Al_2O_3 catalyst for the hydroconversion of model compounds 91

Coke formation

Catalytic hydroprocessing of simulated coal tars. II. Effect of acid catalysts on the hydroconversion of model compounds on a sulphided Ni-Mo/Al $_2$ O $_3$ catalyst 101

Coke formation

Effect of high-temperature reduction on carburization of alumina-supported palladium: evidence for palladium-aluminium alloy formation 267

Coke formation

Coke deposits on H-ZSM-5 zeolite 289

Copper

Stability of passivated Raney copper catalysts during reduction before use 53

Deactivation

Coke deposits on H-ZSM-5 zeolite 289

Disproportionation

Para-selectivity of dialkylbenzenes over modified HZSM-5 by vapour phase deposition of silica 257

Double bond isomerization

Stabilized magnesia: a novel catalyst (support) material 79

Equilibrium calculations

Calculated equilibria for the alkene and alcohol aromatization processes 37

Ethene production

Preparation and evaluation of catalysts for the production of ethylene via steam cracking. Effect of operating conditions on the performance of 12CaO/7Al₂O₃ catalyst 119

EuroNi-1

Characterization of the standard nickel/silica catalyst EuroNi-1. I. Background, aims, organization and outline 59

EuroNi-1

Characterization of the standard nickel/silica catalyst EuroNi-1. II. Chemical aspects: precipitation, reduction and chemical analysis 65

Fused iron

Effect of pressure on the reduction rate of

a fused iron catalyst for ammonia synthesis 111

Gallosilicates

Determination of framework concentrations of gallium in [Ga]-ZSM-5 177

Heptane

Coking and deactivation of zeolites - a Review 1

High-temperature reduction

Effect of high-temperature reduction on carburization of alumina-supported palladium: evidence for palladium-aluminium alloy formation 267

Homogeneous precipitation

Characterization of the standard nickel/silica catalyst EuroNi-1. I. Background, aims, organization and outline 59

Homogeneous precipitation

Characterization of the standard nickel/silica catalyst EuroNi-1. II. Chemical aspects: precipitation, reduction and chemical analysis 65

Hydrocracking

Catalytic hydroprocessing of simulated coal tars. I. activity of a sulphided Ni-Mo/ Al_2O_3 catalyst for the hydroconverison of model compounds 91

Hydrocracking

Catalytic hydroprocessing of simulated coal tars. II. Effect of acid catalysts on the hydroconversion of model compounds on a sulphided Ni-Mo/Al₂O₃ catalyst 101

Iridium

Metallic area of supported iridium catalysts 203

Iron-molybdenum sulphide/carbon

Sulphidation of carbon-supported ironmolybdenum oxide catalysts 217

Kinetics

Effect of pressure on the reduction rate of a fused iron catalyst for ammonia synthesis 111

Kinetics

Potassium promotion of Ni/Al₂O₃ catalysts 159

Kinetics

Determination of framework concentra-

tions of gallium in [Ga]-ZSM-5 177

Kinetics

Oxidative coupling of methane over thallium based silica supported catalysts 241

Methane oxidative coupling

Oxidative coupling of methane over thallium based silica supported catalysts 241

Methanol conversion

Conversion of methanol to hydrocarbons over silica-alumina. Selective formation of lower olefins 139

Methanol conversion

Coke deposits on H-ZSM-5 zeolite 289

Model compounds

Catalytic hydroprocessing of simulated coal tars. I. activity of a sulphided Ni-Mo/Al₂O₃ catalyst for the hydroconversion of model compounds 91

Model compounds

Catalytic hydroprocessing of simulated coal tars. II. Effect of acid catalysts on the hydroconversion of model compounds on a sulphided Ni-Mo/Al₂O₃ catalyst 101

Nickel-molybdenum sulphides

Catalytic hydroprocessing of simulated coal tars. I. activity of a sulphided Ni-Mo/Al₂O₃ catalyst for the hydroconversion of model compounds 91

Nickel-molybdenum sulphides

Catalytic hydroprocessing of simulated coal tars. II. Effect of acid catalysts on the hydroconversion of model compounds on a sulphided Ni-Mo/Al₂O₃ catalyst 101

Nickel/alumina

Potassium promotion of Ni/Al₂O₃ catalysts 159

Nickel/silica

Characterization of the standard nickel/silica catalyst EuroNi-1. I. Background, aims, organization and outline 59

Nickel/silica

Characterization of the standard nickel/silica catalyst EuroNi-1. II. Chemical aspects: precipitation, reduction and chemical analysis 65

Oxidative coupling

Oxidative coupling of methane over thallium based silica supported catalysts 241 Palladium

Oxidative redispersion of palladium and formation of PdO particles in NaY. An application of high precision TPR 189

Palladium-aluminium

Effect of high-temperature reduction on carburization of alumina-supported palladium: evidence for palladium-aluminium alloy formation 267

Palladium/carbon

Effect of Pd/C dispersion on its catalytic properties in acetylene and vinylacetylene hydrogenation 277

Pentene isomerization

Stabilized magnesia: a novel catalyst (support) material 79

Phenanthrene

Catalytic hydroprocessing of simulated coal tars. I. activity of a sulphided Ni-Mo/Al₂O₃ catalyst for the hydroconversion of model compounds 91

Pore structure

Coking and dactivation of zeolites - a Review 1

Propene synthesis

Determination of framework concentrations of gallium in Ga-ZSM-5 177

Regeneration

Oxidative redispersion of palladium and formation of PdO particles in NaY. An application of high precision TPR 189

Regeneration

Para-selectivity of dialkylbenzens over modified HZSM-5 by vapour phase deposition of silica 257

Regeneration

Effect of high-temperature reduction on carburization of alumina-supported palladium: evidence for palladium-aluminium alloy formation 267

Selectivity (acrylic acid)

Effect of the composition of vanadium-titanium binary phosphate on catalytic performance in vapor-phase aldol condensation 29

Selectivity (aromatics)

Calculated equilibria for the alkene and alcohol aromatization processes 37

Selectivity (ethane, ethene)

Oxidative coupling of methane over thallium based silica supported catalysts 241

Selectivity (hydrocarbons, lower-)

Catalytic hydroprocessing of simulated coal tars. II. Effect of acid catalysts on the hydroconversion of model compounds on a sulphided Ni-Mo/Al₂O₃ catalyst 101

Selectivity (olefins, lower-)

Conversion of methanol to hydrocarbons over silica-alumina. Selective formation of lower olefins 139

Selectivity (para-)

Para-selectivity of dialkylbenzenes over modified HZSM-5 by vapour phase deposition of silica 257

Silica-alumina

Conversion of methanol to hydrocarbons over silica-alumina. Selective formation of lower olefins 139

Silicoaluminophosphate

¹²⁹Xe-NMR investigation of SAPO-37 L1

Sintering

Stability of passivated Raney copper catalysts during reduction before use 53

Sintering

Characterization of the standard nickel/ silica catalyst EuroNi-1. I. Background, aims, organization and outline 59

Sintering

Stabilized magnesia: a novel catalyst (support) material 79

Sintering

Oxidative redispersion of palladium and formation of PdO particles in NaY. An application of high precision TPR 189

Sintering

Effect of high-temperature reduction on carburization of alumina-supported palladium: evidence for palladium-alumin-ium alloy formation 267

Stabilized magnesia

Stabilized magnesia: a novel catalyst (support) material 79

Steam cracking

Preparation and evaluation of catalysts for the production of ethylene via steam cracking. Effect of operating conditions on the performance of 12CaO/7Al₂O₃ catalyst 119 Syngas conversion

Stability of passivated Raney copper catalysts during reduction before use 53

Syngas conversion

Potassium promotion of Ni/Al₂O₃ catalysts 159

Thallium oxide/silica

Oxidative coupling of methane over thallium based silica supported catalysts 241

Vanadium-titanium

Effect of the composition of vanadium-titanium binary phosphate on catalytic performance in vapor-phase aldol condensation 29

Vinylacetylene hydrogenation

Effect of Pd/C dispersion on its catalytic properties in acetylene and vinylacetylene hydrogenation 277

Zeolites

Coking and deactivation of zeolites - a Review 1

Zeolites

Calculated equilibria for the alkene and alcohol aromatization processes 37

Zeolites

Catalytic hydroprocessing of simulated coal tars. II. Effect of acid catalysts on the hydroconversion of model compounds on a sulphided Ni-Mo/Al₂O₃ catalyst 101

Zeolites

Conversion of methanol to hydrocarbons over silica-alumina. Selective formation of lower olefins 139

Zeolites

Determination of framework concentrations of gallium in [Ga]-ZSM-5 177

Zeolites

Oxidative redispersion of palladium and formation of PdO particles in NaY. An application of high precision TPR 189

Zeolites

Para-selectivity of dialkylbenzenes over modified HZSM-5 by vapour phase deposition of silica 257

Zeolites

Coke deposits on H-ZSM-5 zeolite 289
